Hello [@Schmuecker, Eric](#)

Below WVD have been assigned. Please follow the attached document which outlines how to connect to your Broadridge WVD remotely.

[WVDDEV0421-126.bsg.ad.adp.com](#)

✓ Available

Off

Eric.Schmuecker@broadridge.com

Below are additional instructions if you are connecting to the Broadridge WVD from MAC OS System .
To subscribe to a feed:

1. Select **Add feed** on the main page to connect to the service and retrieve your resources.
2. Enter the feed URL. This can be a URL or email address:
 - This URL is usually a Windows Virtual Desktop URL. Which one you use depends on which version of Windows Virtual Desktop you're using.
 - For Windows Virtual Desktop, use <https://rdweb.wvd.microsoft.com/api/arm/feeddiscovery>.
 - To use email, enter Broadridge email address. This tells the client to search for a URL associated with your email address if your admin configured the server that way.
3. Select **Subscribe**.

If you have any questions or issues, please contact the [@TSS-Directory Services](#) team.
